

Data governance trust assessment

Trusted data is essential for effective decision-making, analytics, and AI adoption. However, many organisations face challenges with inconsistent data quality, unclear ownership, fragmented governance practices, and limited confidence in the information used across the business.

Adaptiv helps organisations assess their data governance capabilities, identify risks and improvement opportunities, and establish a roadmap to strengthen trust, accountability, and confidence in data.

Why it matters

- ✗ Improve trust and confidence in data
- ✗ Strengthen governance and accountability
- ✗ Improve data quality and consistency
- ✗ Reduce compliance and operational risk
- ✗ Enable analytics and AI initiatives

What this enables:

01. **Data trust**
Improve confidence in the quality, accuracy and reliability of business data
02. **Governance maturity**
Establish clear ownership, policies, standards, and accountability
03. **Risk reduction**
Identify governance gaps and reduce compliance, security, and operational risks
04. **Future readiness**
Create a foundation for analytics, reporting, and AI-driven decision-making

Data governance trust assessment

Our approach

Discovery

We work with you to understand your current state, needs and datasets to identify gaps and opportunities for improvement.

Support

Our team of dedicated support engineers will look after the solution(s) we designed, implemented and deployed for you.

Strategy and design

Our architects define the optimal strategy and create a technical blueprint aligned with your business goals.

Implement and deploy

Our developers will get the work done on time and on budget while following your internal coding standards and DevOps policies.

Technology partners

Using enterprise-leading technologies, Adaptiv's team of certified experts power your new and modern integration architecture.

Skills Group strengthens trust and governance across the data landscape

Industry: Education and training **Platform:** Databricks, Boomi

Skills Group required greater confidence in the quality and consistency of its organisational data. Fragmented processes and varying data practices made it difficult to establish a trusted view of information across the business.

Adaptiv assessed governance capabilities, identified improvement opportunities, and helped define a roadmap to strengthen data quality, ownership, and accountability.

Outcomes

- ✓ Improved confidence in organisational data
- ✓ Greater visibility of governance risks and gaps
- ✓ Clear ownership and accountability for data
- ✓ Roadmap for future governance maturity
