

Integration platform modernisation

Legacy integration platforms can limit agility, increase operational complexity, and make it difficult to support evolving business requirements. As organisations adopt new applications, cloud services, and digital capabilities, modern integration platforms become critical to maintaining connectivity and business performance.

Adaptiv helps organisations modernise their integration platforms, replacing legacy approaches with scalable, secure, and future-ready integration solutions that support long-term growth and innovation.

Why it matters

- ✗ Modernise legacy integration capabilities
- ✗ Improve scalability and platform performance
- ✗ Reduce operational complexity and risk
- ✗ Enable cloud and digital transformation initiatives
- ✗ Support future business growth

What this enables:

01. Modern integration foundations
Replace legacy technologies with scalable and future-ready integration platforms
02. Improved connectivity
Enable reliable integration across applications, data, and business services
03. Operational efficiency
Reduce complexity and improve platform management and supportability
04. Future readiness
Create a foundation for cloud adoption, automation, and innovation initiatives

Integration platform modernisation

Our approach

Discovery

We work with you to understand your current state, needs and datasets to identify gaps and opportunities for improvement.

Support

Our team of dedicated support engineers will look after the solution(s) we designed, implemented and deployed for you.

Strategy and design

Our architects define the optimal strategy and create a technical blueprint aligned with your business goals.

Implement and deploy

Our developers will get the work done on time and on budget while following your internal coding standards and DevOps policies.

Technology partners

Using enterprise-leading technologies, Adaptiv's team of certified experts power your new and modern integration architecture.

Citycare Property modernises integration platforms for greater operational efficiency

Industry: Energy and utilities **Platform:** Boomi

Citycare Property required a modern integration platform to improve connectivity across business systems and support operational efficiency. Existing integration approaches created complexity and limited visibility across critical processes.

Adaptiv implemented a modern integration platform that streamlined system connectivity, improved data flow, and established a scalable foundation for future business requirements.

Outcomes

- ✓ Improved system connectivity and reliability
- ✓ Reduced integration complexity
- ✓ Increased operational efficiency
- ✓ Scalable platform for future growth
