

Application Modernisation

Enable your Digital Transformation Journey - Transform your business with our market leading integration services and products

"Organisations can't afford to fail at digital transformations, especially now that we have entered the era of the digital business, where transformation must be part of enterprise DNA" according to IDC's 2023 FutureScape: Worldwide CIO Agenda 2023 Predictions.

The #1 Reason for failure? A lack of Integration.

Adaptiv supports organisations in today's fast-paced digital landscape. The key to success lies in connecting your systems, applications, and data seamlessly to realise business benefits. Reap the advantages of acquisitions and mergers swiftly and enable a faster time to market than your competitors.

We offer a comprehensive suite of Integration Services and Products designed to streamline your operations, enhance efficiency, and drive innovation and automation.

With years of integration experience across both legacy and new platforms, we enable use cases for ERP upgrades, Work Order Integrations, Mobile App Field Service, Asset Management, Performance Analytics, HR Onboarding, and more.

Why Adaptiv?

- ▶ **Expertise:** Our seasoned professionals bring a wealth of experience and technical prowess to every integration project, ensuring seamless execution and outstanding results.
- ▶ **Innovation:** Stay ahead of the curve by leveraging cutting-edge integration technologies and strategies that drive business growth and competitive advantage.
- ▶ **Reduce costs and save time:** By removing manual processes and integrating your applications, your team can focus more on your core business.

- ▶ **Scalability:** Our solutions and products are designed to scale with your business needs, accommodating increased data volumes and intricate integration scenarios.
- ▶ **Reliability:** Rely on us for dependable, secure, and high-performance integration solutions that keep your operations running smoothly without interruption.
- ▶ **Services:** We collaborate with blue-chip top 100 organisations from sectors like Energy, Financial Services, Healthcare, Education, Construction and more.

Integration Technologies

We utilise the latest industry-leading integration and workflow technologies. Due to our close vendor relationships, we frequently collaborate with them to meet the needs of the Australasian market, establish best practice approaches suited to the local environment, and provide direct input on new feature development.

Integration Technologies:

- ▶ **Boomi:** Adaptiv is one of Boomi's most accomplished and experienced implementation partners in Australasia. We have years of experience designing and delivering Boomi integration projects and are recognised as an advanced integration partner.
- ▶ **Microsoft Azure:** We are a Microsoft Solutions Partner in Digital and Application Innovation, with comprehensive skills in Azure Integration, Application Development, Cloud Platform, and DevOps.
- ▶ **MuleSoft:** Adaptiv has a rich history of working with integration solutions on the MuleSoft platform and extensive experience with on-premises, hybrid, and cloud-based integration solutions using the MuleSoft Anypoint platform.
- ▶ **Solace:** We are among the few certified Solace partners in Australasia and have implemented and support one of the largest Solace environments in ANZ.

The 4 steps to integration success

We start your integration journey by collaborating with you to identify your problem or pinpoint where you have room to improve. Or to find out where you simply need a helping hand.

To ensure we deliver real benefits (the ones that make a difference), we invest in understanding how your business works, your strategy and goals, and what you need to help your leaders and management make better informed and more timely decisions.

STRATEGY

04

SUPPORT

01

DISCOVERY

Strategy and design: Our team crafts integration solutions that bring your disparate systems together, ensuring smooth data flow and real-time communication. Experience enhanced efficiency, reduced manual effort, and accelerated decision-making.

03

IMPLEMENT

Implement and deploy: Sit back and relax – we own this step! Our developers follow your internal DevOps and coding standards policies. Your work will be done on time, and within budget (as long as there's no scope creep). We've done this before, and for many years, and we're very good at it.

Discovery: Leverage our experts' insights to understand your current state and define an integration strategy aligned with your business goals. This can include a requirements-driven approach to selecting the ideal platform.

Support: Once your solution(s) are in place, we'll help you look after them and ensure they are performing optimally. Our team of dedicated support engineers are on call 24/7 and are known for their ability to help getting business-critical applications and environments back on track in a snap.

Are you ready to do better business?
